# ENKIN

## **ZDM150**

# **Enkin 150W LED Zigbee Module**

Markings & Standard(s) CE, UKCA, BS EN 60669-2-1

**Zigbee Protocol** 3.0

Operating Voltage 220-240V AC

Main Frequency 50Hz

Minimum Load 2W LED (2W Incandescant / Halogen)

Maximum Load 150W LED (150W Incandescant / Halogen)

Switch Type Multi way (retractive switch), (2way up/down retractive switch)

**Dimming Protocol** Trailing edge & leading edge phase control

Mounting Box Depth (Min) 35mm

Terminal Capacity 1 x 4mm<sup>2</sup> / 1 x 2.5mm<sup>2</sup> / 3 x 1.5mm<sup>2</sup> / 4 x 1mm<sup>2</sup>

Terminal Markings 2 x 'C' (live), '1' x L (load), '1' x for one way push retractive switch, '2' x for 2 way retractive switch

**Neutral Required** No

**Short Circuit Protection** Yes

**Overload/Overcurrent Protection** Yes

Thermal Protection Yes - Thermal resettable fuse

Soft Start Yes

Power Failure Previous state recall

Memory Yes, non volatile

Min/Max Level Setting Yes - Following a defined procedure

**Driving Mode** Yes - TE & LE mode change following a defined procedure

Product Dimensions 50mm x 49.5mm x 15.1mm

Climate Range 0°C to 40°C, Humidity 0% to 95% non-condensing

Recommended Location Indoor use only

**Maximum Installation Altitude** 2000m

**IP Rating IP2XD**

# WIRING EXAMPLES

#### **ONE-WAY PUSH RETRACTIVE SWITCH WIRING OPTION**

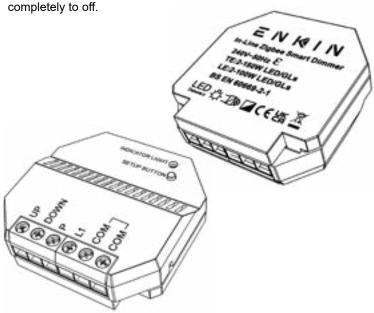

#### **TWO-WAY & OFF PUSH RETRACTIVE SWITCH WIRING OPTION**

# **IMORTANT NOTE:**

Some driverless products can still operate with a small amout of residual current present, such as LED strip lighting etc, it may be necessary to fit a bypass device to allow this product to dim

## **DIMMER SETUP**

**NOTE:** Manual control of the On/Off function and dimming up and down can also be achieved with a connected Retractive Switch, or multiple (parallel) Retractive Switches. Please refer to example circuit diagrams to the right of this text for some connection examples of this option.

A fast click of the retractive switch will turn the lamp (or Load) on and off, holding the switch will alternately dim the lamp up or down, release the switch when desired lamp brightness has been achieved.

The minimum/maximum level and dimming mode can be manually adjusted by following the procedures below.

#### **SETTING THE MINIMUM LEVEL**

- 1. Whilst on, adjust dimmer to your desired minimum brightness.
- 2. Push the rear setup button 3 times within 2 seconds.
- The LEDs will step up and down in brightness once to confirm the setting has been saved.

#### **SETTING THE MAXIMUM LEVEL**

- 1. Whilst on, adjust dimmer to your desired maximum brightness.
- 2. Push the rear setup button 5 times within 3 seconds.
- The LEDs will step up and down in brightness once to confirm the setting has been saved.

### FACTORY RESET FOR MIN/MAX BRIGHTNESS

- Please note this factory reset will reset all the min and max brightness settings.
- 2. Whilst on, push the rear setup button 7 times within 5 seconds.
- The LEDs will step up and down in brightness three times to confirm that the min/max setting has been cleared.

#### **CHANGING THE DIMMING MODE**

The default mode of the dimmer is Trailing Edge, but it can be put into Leading Edge if required. Please ensure that you know the correct mode for your lamp.

- 1. Whilst on, push the rear setup button 9 times within 5 seconds.
- 2. The LEDs will step up and down in brightness twice to confirm the setting has been changed to Leading Edge mode.

#### NOTE:

To switch back to Trailing Edge mode, just repeat the process again, the LEDs will step up and down once to show the dimmer is back in Trailing Edge mode.
