CO-FOUNDER  
LEE LOVETT

A passion for lighting led to  
the creation of the company.

## ABOUT US

Our story begins in Soho, London in 2017. We struggled to find the right lighting and switches for our own renovation projects, refurbishing historical buildings in one of the capital's most characterful neighbourhoods.

Passionate about interior design and with a firm belief in the transformative power of lighting, we saw an opportunity to create beautiful lighting, switches and sockets inspired by period properties yet adapted and technically enhanced for modern living.

Pieces that elevate and enlighten, are reliable, high performing and responsibly made; that offer more than just good looks, marrying form with function for visual comfort and pitch perfect ambiance. So we set up The Soho Lighting Company, creating superior lighting, switches and sockets enabled by innovative technology to help you bring your home to life.

“Lighting can make or break even the most carefully designed interior. It is both an art and a science, with the ability to elevate a space and reveal its true potential.”

Lee Lovett, Co-Founder & Creative Director

### Considered Design

Sustainability is central to our design process and business practices. From the choice of materials and manufacturing methods, to our consideration of a product's lifecycle and circularity, we are committed to making a positive impact.

We are on our journey towards B Corp accreditation, with a mission to harness the transformative power of lighting to drive meaningful change for both people and planet.

### INDUSTRY EXPERTS

## Our *integrated approach* to each project

When you choose The Soho Lighting Company, you are gaining the expertise of our team of professional electricians who, alongside our customer service team, aim to deliver your project with care, efficiency, and expertise. We offer wiring design, extractions from plan and lighting design scoping calls; with each project overseen by a dedicated account manager. From an initial call, through to project scoping, sample room creation, to site visits, and on-time delivery, we are on hand for the duration of your project.

We also offer the opportunity to engage with our team of lighting planners and consultants for independent expert advice and plan production. Enlisting the expertise of a specialist lighting consultant enables you to make the most of your project, however big or small; they will select lighting that will optimise design details, create ambience, and enhance how you live within each space.

For more information about this service, please contact our customer service team on 0208 106 1221 or by email at [info@soholighting.com](mailto:info@soholighting.com)

HISTORIC ROYAL PALACES

# The beauty of the past, reimagined

## LIGHTING HISTORIC HOMES

This year, our continued passion for period architecture has led to an extraordinary collaboration with Historic Royal Palaces – a prestigious partnership celebrating some of Britain's most iconic historic sites. Unveiled in the majestic setting of Kensington Palace, State Apartments, The Palaces Collection is a range of switches and sockets inspired by the opulence, artistry and heritage of royal interiors.

THE SOHO LIGHTING CO.

P. 9

This special collaboration has granted us rare access to the historic sites under the care of Historic Royal Palaces, including Hampton Court Palace and Kensington Palace, as well as the exquisite private homes of Wolterton Hall in Norfolk and The Court of Noke, the elegant 18th-century Herefordshire residence of designer and natural paint pioneer Edward Bulmer.

To step inside these extraordinary homes to showcase our collections has been a huge privilege. As custodians of the past who design for contemporary living, they exemplify the perfect balance of timeless design, rich stories and quiet elegance that our collections encapsulate.

PENDANTS

# Glass Library

Our Glass Library is an extensive collection of handblown glass pendants to suit every taste. Aptly named, our Library contains a wealth of choice, from classic to contemporary silhouettes, decorative and vintage styles to suit any stylish interior. Each shade is meticulously crafted and pairs beautifully with our range of bulbs and selection of fittings and finishes.

## OUR Design *philosophy*

It's in the detail...

Passionate about craftsmanship, we care about the finer details. Our skilled design team creates lighting that effortlessly fuses form and function. In partnership with Enkin technology, our in-house team of electrical experts work hand in hand with our creators and makers to engineer beautiful, technically advanced lighting that will illuminate and transform your spaces.

With sustainable principles, we have purposely curated a collection of luxury lighting, bulbs, switches and sockets that offers exceptional quality with circular design, people and planet in mind. We balance traditional craft and skill with modern manufacturing to provide you with timeless and elegant lighting you will love for years to come.

**Friends of  
the ocean**

Fishy Filaments™ was founded in Cornwall and recycles used fishing nets and waste netting, transforming it into engineering grade filament to be used to make commercially viable products via 3D printing. Now that there is value in old netting, fishermen are no longer discarding nets into the sea and are actively retrieving old nets from our oceans. Lee Lovett says: "This fabulous sustainable concept from Fishy Filaments", and other recycled plastic materials has enabled us to create beautiful, stylish pendants to adorn and light luxury interiors whilst helping to protect our diminishing ocean sea life."

# Linen Collection

SOFT WHITE

A beautifully crafted collection of pendant lighting inspired by the subtle folds of draped cloth. Emulating the delicate properties of linen through its organic curves and shape, the Linen Collection is sustainably produced from recycled plastics using 3D printing techniques for an environmentally conscious lighting choice.

# The Artisan Collection

Our new Artisan Collection offers a wonderful opportunity to collaborate with talented makers and designers from around the world - each chosen for their ability to capture timeless design while bringing their own distinct perspective. This special collection celebrates the beauty of craftsmanship, offering a platform to showcase extraordinary talent from across the globe.

THE SOHO LIGHTING CO.

## Siddeley Ceramics at Soho Lighting

We have teamed up with renowned landscape architect Randle Siddeley to develop a collection of table lamps inspired by his travels to Nicaragua. Hand-made from volcanic clay by Nicaraguan artisans, each lamp is hand-painted with idiosyncratic shapes and geometric patterns in a monochromatic palette for a true statement piece.

From: £820

## Lexham Floor Lamp

Also in collaboration with Randle Siddeley, The Lexham is a stunning wooden floor lamp, hand-turned for a wonderfully organic shape and featuring a subtle gold washed interior for a soft output of light. These unique lamps are like no other, offering a stunningly lit Art d'Object feature along hallways and secluded corners. Perfect for highlighting architectural features, they also complement modern interiors and offer flexible placement without installation. Each lamp is hand-made for a truly one-of-a-kind piece.

From: £620

“The collection is a modern take on classical patterns and nature; embracing the naturally imperfect to create designs that are chic, authentic and unique.”

RANDLE SIDDELEY

P. 61

# BULBS FOR Every setting

At Soho Lighting, we offer a variety of traditional and vintage-style, high CRI light bulbs for perfect ambience.

## China White

Dimmable, warm white LED light bulbs. These matt bulbs diffuse light more evenly, which reduces glare and harsh shadows. This softer light creates an inviting atmosphere in areas like bedrooms and living spaces and makes them a good choice for reading lamps. They blend well with light fixtures for a minimalist aesthetic.

## High CRI

High CRI (Colour Rendering Index) gives you accurate colour representation, enhanced visual clarity and improved aesthetics. Available in a range of sizes and shapes, the notable high CRI offers near-natural light.

## Sunset

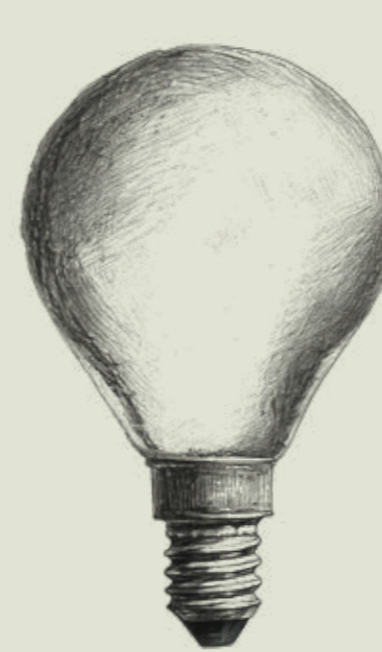

This vintage-Edison style range provides the traditional look of the Edison decorative filament bulbs with the benefits of long-life, low-energy LED technology.

## Dim To Warm

These intelligent bulbs mimic the dimming behavior of traditional incandescent bulbs by changing their colour temperature as they dim. Offering versatility, they can produce bright, cooler light for tasks and activities during the day, and warm, soft light for relaxing in the evening.

## Opal

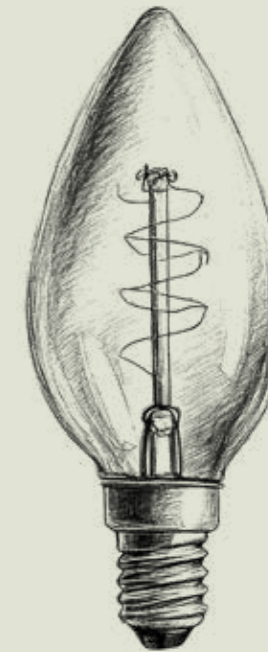

With a decorative gold cap and dimmable capabilities, the Opal light bulb, with its pearly exterior, emits a soft, subtle light. This high CRI and 2700K bulb produces a warm white ambience perfect for calm, tranquil settings and relaxed evenings.

# OUTDOOR LIGHTING

## The Chelsea Collection

● SOLID BRASS ● MARINE GRADE STEEL

Perfect for illuminating your outside spaces, our Chelsea Collection is handcrafted from solid brass or marine grade steel, water immersible with an IP68 rating, plus, due to its low voltage, kind to nocturnal wildlife.
